

**SOLHYS**  
Solar Hybrid Systems

**Power outage?  
High electricity bills?**

**We have a smart SOLAR HYBRID solution!**

## NP Smart Base powered by Solar Hybrid Systems

A combination of photovoltaics, battery and generator joined in a product named NP Smart Base ; it is an ideal solution for electrical energy generation in areas with unreliable electrical networks and even without existing infrastructure.

Key advantages of our products:

- Simplest installation and operation
- Replacing polluting and expensive generators and unreliable power grids by the most advanced PV system including long life batteries and comprehensive energy management
- Uninterrupted and safe power supply even under harsh climatic conditions
- Lowest system operation and maintenance cost, based on free solar energy and maintenance free components

### About us

The company Solar Hybrid Systems d.o.o. ([www.solhys.com](http://www.solhys.com)) was established in 2015 in cooperation with the company E-Projekt d.o.o. (Maribor) and New Power Energy AG (Sarnen, Switzerland).

The vision of the company is to offer the market a wholesome product which is practical and simple to use and which offers the user reliable 24 hour electrical energy supply without interruptions, with minimal operation costs.
